

Paragon SC2 Kiln with Bead Door

Warm Glass UK - www.warm-glass.co.uk - tel:01934 863344

Description

This unbeatable value, low-cost controllable kiln has proved itself as the best all round beginners kiln on the market. This version comes with a bead door so the kiln can be used for bead annealing as well as fusing.

A good looking design with a simple programmer, the SC2 kiln by Paragon is the best choice if you are looking for a versatile kiln which is suitable for everything from Silver Clay and Enamelling to Glass and Bead Annealing.

With a new format for the elements, the only drawback to this kiln is that you will probably want something bigger before long.

Certified CE Compliant

Programmer

The simple Sentry Express 4.0 has four independent programmes each with 8 segments as well as five 'speed' programmes where you simply set the top temperature and hold time, providing controllable results at low cost.
