

Nabertherm Kiln GF-190

Warm Glass UK - www.warm-glass.co.uk - tel: 01934 863344

Description

Three phase or single phase fusing kiln with digital programmer. This large professional kiln is built in Germany to an excellent standard by Europe's largest kiln manufacturer. This is the new 2011 design.

With a very attractive dual shell stainless steel housing and a clean simple flat table interior which provides a stable fusing surface and ease of access, this kiln is a quality choice. The sturdy rolling stand is a real bonus when moving the kiln around, and the large metal handles on either side make operation easy. Infra-red heating elements mounted on the ceiling with fibre insulation, ensures rapid heat up and cooling rates for optimum results.

Shelves are not included with the kiln. On request Nabertherm can supply 2 shelves for this kiln each measuring 44cm x 49cm.

Certified CE Compliant

Programmer

The GF-190 now comes with the upgraded C440 programmer. It is versatile and simple to use once program settings have been entered. We use one in our studio so we can talk you through programming. It has 10 programs, each with an impressive 20 segments, as well as start delay, skip-button and much more – See C440 Technical Data Sheet for more information.
