

- Internal size 850mm x 510mm x 330mm.
- 6kw single phase or three phase and neutral.
- 960c maximum temperature.
- Quartz tube "infra-red" heating system.
- Stainless Steel chamber and base.
- Lid spring lift assist.
- 110mm recess in floor.
- KCR32C digital Control with 32 programs and 32 ramps.
- Optional KCR32CWIFI control with GATEway internet access.
- Fast react thermocouple.
- Non ceramic fibre lid section.
- Light weight refractory brick base.
- Fast cooling.
- Large vent/spy hole with spring return, anti-dust flap.
- Optional stand and inner shelf kit.
- Optional lockable swivel castors for stand.
- Designed and built by Kilncare in the U.K.
- **FOUR years guarantee on ALL parts INCLUDING the elements.**

The Pro-fuser-D and the Pro-fuser are the 3rd members to the "fuser" family of glass kilns and the largest that can be bench mounted.

The Pro-fuser-D fills in the gap between Cub-fuser-D and Deluxe-fuser and offers more height than the standard Pro-fuser.

The KCR32C programmer offers 32 adjustable programs with 32 segments in each program.

The **KCR32CWIFI** is an optional extra which allows your kiln to be monitored over the internet using the Kilncare GATEway server.

There are many features inside the GATEway such as a program and firing library and writing programs inside the GATEway, naming them and then sending them to the controller.

The Pro-fuser offers a large capacity floor space allowing for larger quantities and larger singular pieces than the Hobbyfuser 3 and Cub-fusers can manage.

As with all of the "fuser" family, the Pro-fuser comes with Kilncare's 4 year guarantee on all parts including the elements.
