

#### ANNOUNCEMENT REGARDING A CHANGE IN THE PRODUCT PERFORMANCE

Due to issues of ingredient availability the formula for Castalot has changed.  
This may be temporary change as we continue sourcing ingredients and testing

Castalot still has the same workability in terms of great surface quality, carvability, and ease of use but please note this new version SETS UP MORE QUICKLY than the original version.

It is recommended that you create a small test batch to see how it works. You may have to add a bit more water. Please plan your project accordingly

We find this new version is a stronger mold.

We are constantly striving to make the product better.

Feel free to email with questions or product support with your project.
