

WHAT'S NEW: OPAQUE FRIT & REACTIVE FRITS

Developed from three popular sheet glass styles, these frits present exciting new possibilities for kilnformers and torchworkers. The opaque frit provides maximum contrast and opacity in a white glass, while the reactive frits can be used to develop unique special effects, ranging from subtle to dramatic.

WHITE OPAQUE
000013

Our brightest, most opaque white frit.

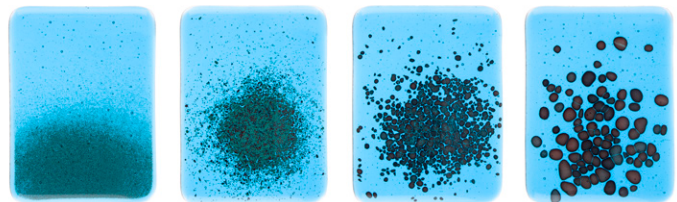

White 000113

White Opaque
000013

REACTIVE ICE
001009

Reacts under kiln heat with several copper-bearing glasses and silver leaf and foil.

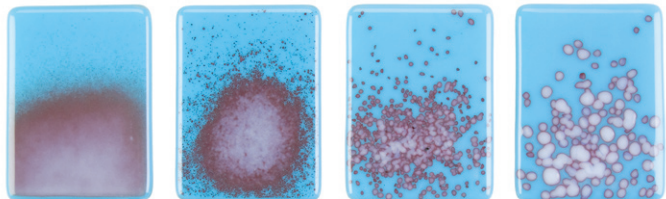

Reactive Ice (001009) fired on Turquoise Blue (001116).

REACTIVE CLOUD
000009

Reacts under kiln heat with several copper-bearing glasses and silver leaf and foil. Fired on its own, slightly bluer and more translucent than White (000113).

Reactive Cloud (000009) fired on Light Cyan (000216).

These Bullseye frits are made from crushed, screened and magnetically cleaned Bullseye Compatible sheet glass. They come in coarse, medium, fine and powder mesh sizes and are packaged in 5 oz (0.14 kg), 1 lb (.45 kg), and 5 lb (2.27 kg) wide-mouth jars.
