

Nabertherm Kiln F-110

Warm Glass UK - www.warm-glass.co.uk - tel:01934 863344

Description

A well-priced and quality bath tub kiln, ideal for many fusing applications as well as deeper work due to the additional side element. The insulation is made from lightweight refractory bricks and the sturdy rolling stand is a real bonus when moving the kiln around. No kiln shelf supplied. Single phase connection (a 3 phase (400V) version also available on request).

Certified CE Compliant

Programmer

The C440 programmer is versatile and simple to use once programme settings have been entered. It has 10 programmes, each with 20 segments, start delay and much much more – See the specification download for full details.
